Project Design Phase-I
Proposed Solution Template

Date	23.10.23
Project Name	Project - Chat app
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Inefficient communication and collaboration within remote teams, leading to decreased productivity and project delays.
2.	Idea / Solution description	A collaborative chat app designed specifically for remote teams, integrating real-time document sharing, task management, and video conferencing to streamline communication and enhance productivity.
3.	Novelty / Uniqueness	The app distinguishes itself by offering a seamless integration of essential collaboration tools within the chat interface, providing a one-stop solution for remote team communication and project management.

4.	Social Impact / Customer Satisfaction	The solution aims to significantly improve work efficiency for remote teams, fostering better collaboration and reducing stress associated with disjointed communication. Enhanced customer satisfaction is anticipated through a more streamlined and comprehensive platform.
5.	Business Model (Revenue Model)	The app will adopt a freemium model, offering basic features for free and charging a subscription fee for advanced functionalities such as expanded storage, premium collaboration tools, and priority customer support.
6.	Scalability of the Solution	The solution is designed with scalability in mind, capable of accommodating a growing user base and evolving to meet the changing needs of remote work dynamics. The underlying infrastructure is scalable to handle increased data loads and user interactions.
